2015-6

THE

AMERICAN

JOURNAL OF SCIENCE.

EDITORS

JAMES D. AND E. S. DANA, AND B. SILLIMAN

ASSOCIATE EDITORS

PROFESSORS ASA GRAY, JOSIAH P. COOKE, AND JOHN TROWBRIDGE, OF CAMBRIDGE,

PROFESSORS H. A. NEWTON AND A. E. VERRILL, OF NEW HAVEN,

PROFESSOR GEORGE F. BARKER, OF PHILADELPHIA.

THIRD SERIES.

VOL. XXIV.—[WHOLE NUMBER, CXXIV.]

Nos. 139—144.

JULY to DECEMBER, 1882.

WITH SEVEN PLATES.

NEW HAVEN, CONN.: J. D. & E. S. DANA.

1882.

TUTTLE, MOREHOUSE & TAYLOR,
PRINTERS,
371 State Street, New Haven, Connecticut, U. S. A.

CONTENTS OF VOLUME XXIV.

NUMBER CXXXIX.

Page

ART. I.—Contributions to Meteorology; by ELIAS LOOMIS. Seventeenth Paper. With three plates, ... 1

II.—The phenomena of Metalliferous Vein-formation now in progress at Sulphur Bank, California; by JOSEPH LECONTE and W. B. RISING, ... 23

III.—Modes of occurrence of the Diamond in Brazil; by ORVILLE A. DERBY, ... 34

IV.—On the influence of time on the Change in the Resistance of the Carbon Disk of Edison's Tasimeter; by T. C. MENDENHALL, ... 43

V.—Further observations on the crystallized sands of the Potsdam Sandstone of Wisconsin; by A. A. YOUNG, ... 47

VI.—On the origin of Jointed Structure; by G. K. GILBERT, 50

VII.—Break-circuit arrangements for transmitting Clock-beats; by FRANCIS E. NIPHER, ... 54

VIII.—Cirriped Crustacean from the Devonian; by JOHN M. CLARKE, ... 55

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Absorption-Spectrum of Ozone, CHAPPUIS, 56.—Liquefaction of Ozone. HAUTEFEUILLE and CHAPPUIS: Nitrogen Sulphide, BERTHELOT and VIEILLE, 57.—Permitric oxide, HAUTEFEUILLE and CHAPPUIS, 58.—Crystallization of Anhydrous Glucose from an Aqueous Solution, BEHR, 59.—Transformation of Carbonyl Sulphide into Urea, BERTHELOT: Note on the Littrow form of Spectroscope, BRACKETT, 60.—Relation between Galvanic Polarization and the surface Tension of Mercury, LIPPMAN, 61.—The change of color-tones of spectrum colors and pigments with decreasing light, CHODIN: Specific resistance of Mercury, 62.—Eclipse of 1882: Diffraction gratings, ROWLAND: Methods for Calibrating Thermometers, THIESEN, 63.

Geology and Mineralogy.—Abstract of a Report upon the Geology and Mining Industry of Leadville, Colorado, EMMONS, 64.—Notes on Alaska Tertiary Deposits, DALL, 67.—Origin of Jointed Structure, KINAHAN, 68.—American Geological Society: Catalogue of the Fossil Foraminifera of the Collection of the British Museum, JONES, 69.—Brief Notices of some recently described minerals, 70.—Statistics of the Production of the Precious Metals in the United States, KING: Supposed Organic remains in meteorites: Notes on the Mineralogy of Missouri, LEONHARD, 71.

Botany and Zoology.—Characeæ Americanæ Exsiccatæ, distributæ a T. F. ALLEN: Versuch einer Entwickelunsgsgechichte der Pflanzenwelt insbesondere der Florengebiete seit der Tertiärperiode, ENGLER: The Genus Isoëtes in North America, ENGELMANN: Flore de la Gironde, CLAVAUD, 72.—Beitrag zur Kenntniss der Ustilagineen. WORONIN, 73.—Salmon Disease, 74.

Miscellaneous Scientific Intelligence.—Bibliographie générale de l' Astronomie, HOUZEAU et LANCASTER, 76.—Life in Hawaii, COAN: Studies in Science and Religion, WRIGHT: Knight's New Mechanical Dictionary, 77.—Report of the Board of Regents of the Smithsonian Institution for 1880: British, French and Helvetian Associations, 78.

Obituary.—William Barton Rogers, 78.—Dr. Augustus A. Hayes: Dr. George W. Hawes, 80.

NUMBER CXL.

Page

ART. IX.—Tertiary History of the Grand Cañon District; by CLARENCE E. DUTTON. With plate IV, ... 81

X.—Relative Temperatures of the two Hemispheres of the Earth; by WILLIAM FERREL, ... 89

XI.—Air-thermometer whose indications are independent of the Barometric Pressure; by ALBERT A. MICHELSON, ... 92

XII.—Bearing of some Recent Determinations on the Correlation of the Eastern and Western Terminal Moraines; by T. C. CHAMBERLIN, ... 93

XIII.—The Flood of the Connecticut River Valley from the melting of the Quaternary Glacier. 6. The question as to the Elevation of the Land; by JAMES D. DANA, ... 98

XIV.—Retardation of the Maxima and Minima of Air-pressure at High Stations; by H. A. HAZEN, ... 105

XV.—General Principles of the Nomenclature of the Massive Crystalline Rocks; by A. WENDELL JACKSON, ... 113

XVI.—The Minerals, mainly Zeolites, occurring in the basalt of Table Mountain, near Golden, Colorado; by W. CROSS and W. F. HILLEBRAND, ... 129

XVII.—A Property of the Isentropic Curve for a Perfect Gas as drawn upon the Thermodynamic Surface of Pressure, Volume and Temperature; by F. E. NIPHER, ... 138

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Constitution of Solutions, KRÜSS, 141.—Vapor-density of Bromine, JAHN, 142.—New method for preparing Hyponitrous acid, ZORN: Apparatus for Liquefying Gases, REYNOLDS, 143.—Function of two ears in the perception of space, S. P. THOMPSON: Vapor tension of mercury, HAGEN: Electrostatic dimensions of a magnetic pole, CLAUSIUS: The electricity of flames, 144.—Kerr's Phenomenon, H. BRONGERSMA, 145.

Geology and Mineralogy.—Structure and movement of Glaciers, F.-A. FOREL, 146.—Upper Silurian fossils in the metamorphic rocks of Bergen, Norway, H. H. REUSCH, 148.—Geological Examinations in Southern Colorado and Northern New Mexico, J. J. STEVENSON, 149.—Manual of the Geology of India, V. BALL: Report of Progress of the Geological Survey of Canada, A. R. C. SELWYN, 151.—The Faröe Islands, J. GEIKIE.—Ammonites in the Tejon Group of California, A. HEILPRIN, 152.—Paleontology of the Brazilian Geological Survey, C. A. WHITE: Geological Sketches at Home and Abroad, A. GEIKIE: Columbite, Orthite and Monazite from Amelia Co., Virginia, DUNNINGTON, 153.—Propagation of heat as determined by the crystalline structure of minerals and by the schistose structure of rocks, JANNETTAZ: Milwaukee Clays and Bricks, E. T. SWEET, 154.—Sammlung von Mikrophotographien zur Veranschaulichung der mikroskopischen Structur von Mineralien und Gesteine ausgewählt, E. COHEN: Occurrence of Vivianite in Los Angeles Co., California, H. G. HANKS: Helvite from Virginia, H. C. LEWIS: Nickel Ore in Oregon, 155.—Corundum from Lehigh Co., Penn, E. F. SMITH and N. W. THOMAS, 156.

Botany and Zoology.—Our Native Ferns and their Allies, L. M. UNDERWOOD: Europas och Nord Amerikas Huitmossor, S. O. LINDBERG, 156.—Nomenclator Zoologicus, S. H. SCUDDER: Synopsis of the Fresh-water Rhizopods, R. HITCHCOCK, 157.

Miscellaneous Scientific Intelligence.—American Association, 157.—Darwin Memorial Fund: Transactions of the Connecticut Academy of Arts and Sciences, 159.—*Obituary.*—G. W. Hawes.

NUMBER CXLI.

Page

ART. XVIII.—The affinities of *Palæocampa* Meek and Worthen, as evidence of the wide diversity of type in the earliest known Myriapods; by SAMUEL H. SCUDDER,... 161

XIX.—A source of the Bituminous matter in the Devonian and Sub-Carboniferous Black Shales of Ohio; by E. ORTON,... 171

XX.—A Pendulum Study; by O. T. SHERMAN,... 175

XXI.—Effect of Mechanical Hardening on the Magnetic Properties of Steel and Iron; by L. M. CHEESMAN,... 180

XXII.—The Deerfield Dyke and its Minerals; by B. K. EMERSON,... 195

XXIII.—The Löss and associated Deposits of Des Moines, Iowa; by W. J. McGEE and R. E. CALL. With Plate V, 202

XXIV.—Orthocynodon, an animal related to the Rhinoceros, from the Bridger Eocene; by W. B. SCOTT and H. F. OSBORN,... 223

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Atomic Weight of Carbon, ROSCOE, 225.—Determination of Chromium as Phosphate, CARNOT: Earth-metals of Samarskite, ROSCOE, 226.—Precipitation of Gylcogen, KÜLZ: Transformation of Urea into Cyanamide, FENTON, 227.—Oscillation of the plane of polarization by the discharge of a battery, BICHAT and BLONDOT, 228.

Geology and Natural History.—Relative ages and classification of the Post-Eocene Tertiary deposits of the Atlantic Slope, A. HEILPRIN, 228.—Classification of Lake Basins, W. M. DAVIS: The Catskill Region, W. M. DAVIS: Address before the Geological Society at the anniversary meeting in December, 1882, ROBERT ETHERIDGE: Artificial forms of Silica, J. I'ANSON and E. A. PANKHURST, 230.—Origin and Relations of the Carbon Minerals, J. S. NEWBERRY: Lehrbuch der Mineralogie, G. TSCHERMAK: New Swedish Minerals, L. I. IGELSTRÖM, 232.—Female Flowers of Coniferæ, CELAKOVSKY, 233. — Report on the Crustacea dredged by the Steamer "Blake," S. I. SMITH: Fragments of the coarser anatomy of Diurnal Lepidoptera, S. H. SCUDDER: Memoirs of the Boston Society of Natural History, 235.

Miscellaneous Scientific Intelligence.—Berliner Astronomisches Jahrbuch für 1884 mit Ephemeriden der Planeten (1) to (220) für 1882, 235.—Transit of Venus: Report upon Experiments and Investigations to develop a System of Submarine Mines for defending the Harbors of the United States, H. L. ABBOTT, 236.—Professional Papers of the Signal Service: Celebrated American Caverns, H. C. HOVEY, 238.—Scientific Survey connected with the Northern Pacific Railroad: Darwin Memorial, 239.—*Obituary*—General Gouverneur Kemble Warren, 239.—George P. Marsh: Professor M. F. Balfour: Edward Desor, 240.

NUMBER CXLII.

Page

ART. XXV.—Notes on Physiological Optics. No. 5. Vision by the Light of the Electric Spark; by W. L. STEVENS, 241

XXVI.—Crystals of Monazite from Alexander County, North Carolina; by E. S. DANA, 247

XXVII.—Occurrence and Composition of some American varieties of Monazite; by S. L. PENFIELD, 250

XXVIII.—Irregularities in the Amplitude of Oscillation of Pendulums; by C. S. PEIRCE, 254

XXIX.—Stresses caused in the Interior of the Earth by the Weight of Continents and Mountains; by G. H. DARWIN, 256

XXX.—The Deerfield Dyke and its Minerals; by B. K. EMERSON, 270

XXXI.—Occurrence of Siphonotreta Scotica in the Utica Formation near Ottawa, Ontario; by J. F. WHITEAVES, 278

XXXII.—A recent species of Heteropora from the Strait of Juan de Fuca; by J. F. WHITEAVES, 279

XXXIII.—Notes on interesting Minerals occurring near Pike's Peak, Colorado; by W. CROSS and W. F. HILLEBRAND, 281

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—The production of electricity regarded as the equivalence of a chemical process, BRAUN, 286.—Absorption of the Electric Light by the Atmosphere, AYRTON and PERRY: Tension of Mercury Vapor at low temperatures: Influence of the quantity of gas dissolved in a liquid upon its surface tension, WROBLEWSKI: State of Carbon in Iron and Steel, MARSDEN, 287.—Limit of the liquid state of Matter, HANNAY, 289.—Crystallization of silica from fused metals, 290.

Geology and Mineralogy.—Geological age of the Taconic System, J. D. DANA, 291.—Geological Report on Indiana for 1881, J. COLLETT, 293.—Nummulitic deposits in Florida, A. HEILPRIN: Mastodons in N. Jersey, LOCKWOOD, 294.—New Fossil Marsupials, E. D. COPE: Fossil Corals of the Niagara and Upper Helderberg Groups, J. HALL: Silurian Corals from Northern Russia and Siberia, G. LINDSTRÖM: Supposed subterranean drainage of the interior of Australia, W. E. ABBOTT, 295.

Botany and Zoology.—Sopra un Organo finora non avertito di alcuni Embrioni Vegetali, G. BRIOSI, 296.—Latent Vitality of Seeds: Contributions to American Botany, S. WATSON, 297.—Contributions to North American Botany, A. GRAY, 298.—Journal of the Linnean Society: Analyses of the ash of Epiphytic Plants, A. DIXON, 299.

Astronomy.—Elements of the great Comet of September, 1882: Anales de la Officina Meteorológica Argentina, por su director, B. A. GOULD, 301.—Monograph of the Central parts of the Nebula of Orion, E. S. HOLDEN: Report of the Superintendent of the U. S. Coast and Geodetic Survey, 1878: Report of the Superintendent of the U. S. Coast and Geodetic Survey, 1879: Resultados del Observatorio Nacional Argentino en Córdoba, B. A. GOULD, 302.

Miscellaneous Scientific Intelligence.—Meeting of the American Association for the Advancement of Science, at Montreal, 303.—British Association, fifty-first meeting, at Southampton, 310.—Report of the New York State Survey, 1880, J. T. GARDINER: Cause of the Infection of the Waters at Lille, M. A. GIARD, 318.—Academy of Sciences of St. Louis, 1882: Journal and Proceedings of the Royal Society of New South Wales, 1881, A. LIVERSIDGE, 319.—U. S. Commission of Fish and Fisheries, S. F. BAIRD, 320.—*Obituary*—Liouville: Plantamour, 320.

NUMBER CXLIII.

Page

ART. XXXIV.—Remarks concerning the Flora of North America; by ASA GRAY, ... 321

XXXV.—Notes on Physiological Optics. No. 6: Binocular Union of Spectral Images; by W. LECONTE STEVENS,.. 331

XXXVI.—New views of Mr. G. H. Darwin's Theory of the Evolution of the Earth-Moon System; by S. HAUGHTON, 335

XXXVII.—Recent discoveries in the Erian (Devonian) Flora of the United States; by J. W. DAWSON, ... 338

XXXVIII.—Triassic Trap Rocks of Massachusetts, Connecticut and New Jersey; by W. M. DAVIS, ... 345

XXXIX.—The Deerfield Dyke and its Minerals; by B. K. EMERSON, ... 349

XL.—Notice of the remarkable Marine Fauna occupying the outer banks off the Southern Coast of New England, No. 7; and of some additions to the Fauna of Vineyard Sound; by A. E. VERRILL, ... 360

XLI.—North American Minerals; by W. E. HIDDEN, ... 372

XLII.—Martite of the Cerro de Mercado, or Iron Mountain, of Durango, Mexico, and certain Iron Ores of Sinaloa; by B. SILLIMAN, ... 375

XLIII.—The Thomson Effect; by JOHN TROWBRIDGE and C. B. PENROSE, ... 379

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Carbon dioxide of the Atmosphere, REISET, 387.—Basic Copper Sulphate, STEINMANN: Relation between Magnetic Rotatory Polarization and Chemical Composition, PERKIN, 389.—Vapor density of Chlorine peroxide, PEBAL and SCHACHERL, 390.—Perchloric Acid, BERTHELOT, 391.—Diffusion of Gases, K. WAITZ: Diamagnetism of Bismuth in absolute measure, v. ETTINGSHAUSEN: Pressure of Saturated Mercury Vapor, H. HERTZ: The Microphone, W. H. PREECE: Telegraphy without a Cable, W. H. PREECE, 394.—Sunlight and Skylight at High Altitudes, LANGLEY, 393.

Geology and Natural History.—Contributions to Mineralogy, F. A. GENTH, 398.—Anthracite in Sonora, Mexico, E. T. COX, 399.—Manual of Blowpipe Analysis, Qualitative and Quantitative, H. B. CORNWALL: New Family of Rugose Corals, J. THOMSON: Trees and Tree-culture: Familien Podostemaceæ, E. WARMING, 400.—G. L. GOODALE: U. S. Geological and Geographical Survey of the Territories, F. V. HAYDEN: Young Stages of Osseous Fishes, A. AGASSIZ, 401.

Astronomy.—Method for Observing Artificial Transits, J. M. SCHAEBERLE, 401.—Annals of the Astronomical Observatory of Harvard College, J. WINLOCK and E. C. PICKERING: Photographic Spectrum of Comet (Wells) I, 1882, W. HUGGINS, 402.—Washburn Observatory of the University of Wisconsin, E. S. HOLDEN: Washington Observations for 1878, 403.

Miscellaneous Scientific Intelligence.—New method of measuring Heights by means of a Barometer, G. K. GILBERT, 404.—Professional Papers of the Signal Service, J. P. FINLAY, 407.—The Elements of Forestry, F. B. HOUGH, 408.

NUMBER CXLIV.

Page

ART. XLIV.—Terraces and Beaches about Lake Ontario; by J. W. SPENCER. With Plates VI and VII, ... 409

XLV.—Apparent Attractions and Repulsions of Small Floating Bodies; by JOHN LECONTE, ... 416

XLVI.—High Terraces of the Rivers of Eastern Connecticut; by B. F. KOONS, ... 425

XLVII.—Note on the former Southward Discharge of Lake Winnepeg; by J. D. DANA, ... 428

XLVIII.—Alleged Change in the Resistance of Carbon due to Change of Pressure; by SYLVANUS P. THOMPSON, ... 433

XLIX.—Figure of the Nucleus of the bright comet of 1882 (Gould); by EDWARD S. HOLDEN, ... 435

L.—Eccentricity and Perihelion Longitude of the Earth's Orbit as a cause of change of Climate; by S. HAUGHTON, .. 436

LI.—Crystals of Axinite from a locality near Bethlehem, Penn., with remarks upon the analogies between the crystalline forms of Axinite and Datolite; by B. W. FRAZIER, ... 439

LII.—Marine Fauna occupying the outer banks off the Southern Coast of New England; by A. E. VERRILL, ... 447

LIII.—Experiments in Cross-breeding Indian Corn with flowers of the same variety; by W. J. BEAL, ... 452

CHARLES DARWIN, ... 453

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Reciprocal Solutions of Liquids, ALEXÉEFF: Crystallization-experiments, proving Berthollet's law of partition, BRÜGELMANN, 464.—Oxidation of Carbonous oxide by Oxygen and Palladium-Hydrogen, TRAUBE: Silicon Sulphides, SABATIER: Constitution of Bleaching Powder, KRAUT, 465.—Preparation of Lead peroxide, FEHRMANN: Azaurolic Acids, V. MAYER and CONSTAM, 466.—Indophenol and Solid Violet, KOECHLIN and WITT, 467.—Soluble Alizarin-Blue, BRUNCK and GRAEBE: Amount of Carbon Dioxide in the Atmosphere, E. RISLER, 468.—Solubility of Carbon dioxide in water under high pressures, WROBLEWSKI: Application of the Spectro-polariscope to Sugar Analysis, W. G. LEVISON, 469.—Soundless Zones in connection with fog signals, TYNDALL, 470.—Reversal of the Metallic Lines in over-exposed Photographs of Spectra, W. N. HARTLEY, 471.—Thermal Conductivity of Minerals and Rocks, THOULET, 472.

Geology and Natural History.—Oscillation of Land in the Glacial period, JAMIESON, 473.—Bulletin of the American Museum of Natural History, R. P. WHITFIELD: American Palæozoic Fossils, S. A. MILLER: A new fossil Pseudoscorpion, GEINITZ, 474.—Paleozoic Cockroaches: Samarskite, HOFFMANN: Mineralogical Notes, WEISBACH, 475.—Rezbanyite, a new mineral, FRENZEL: Danburite from Switzerland: Wurtzite from Montana, R. PEARCE: A Dictionary of Popular Names of the Plants, etc., J. SMITH, 476.—Description of new Cephalopoda, T. W. KIRK: New England Spiders of the family Theridiidæ, J. H. EMERTON: A Mongraph of the British Spongiada, J. S. BOWERBANK, 477.—Lehrbuch der vergleichenden Anatomie der Wirbelthiere, R. WIEDERSHEIM: Synopsis of the Classification of the Animal Kingdom, H. A. NICHOLSON: Vertebrates of the Adirondack Region, C. H. MERRIAM: The Coues Check List of North American Birds: Catalogue of the Australian Stalk- and Sessile-eyed Crustacea, W. A. HASWELL, 478.

Miscellaneous Scientific Intelligence.—The Gulf Stream from the investigations of the Steamer Blake, J. R. BARTLETT, 479.—Distribution of Government Scientific publications, 481.—DUTTON'S Report on the Tertiary History of the Grand Cañon District: National Academy of Sciences, 482.—*Obituary*—Henry Draper, 482.

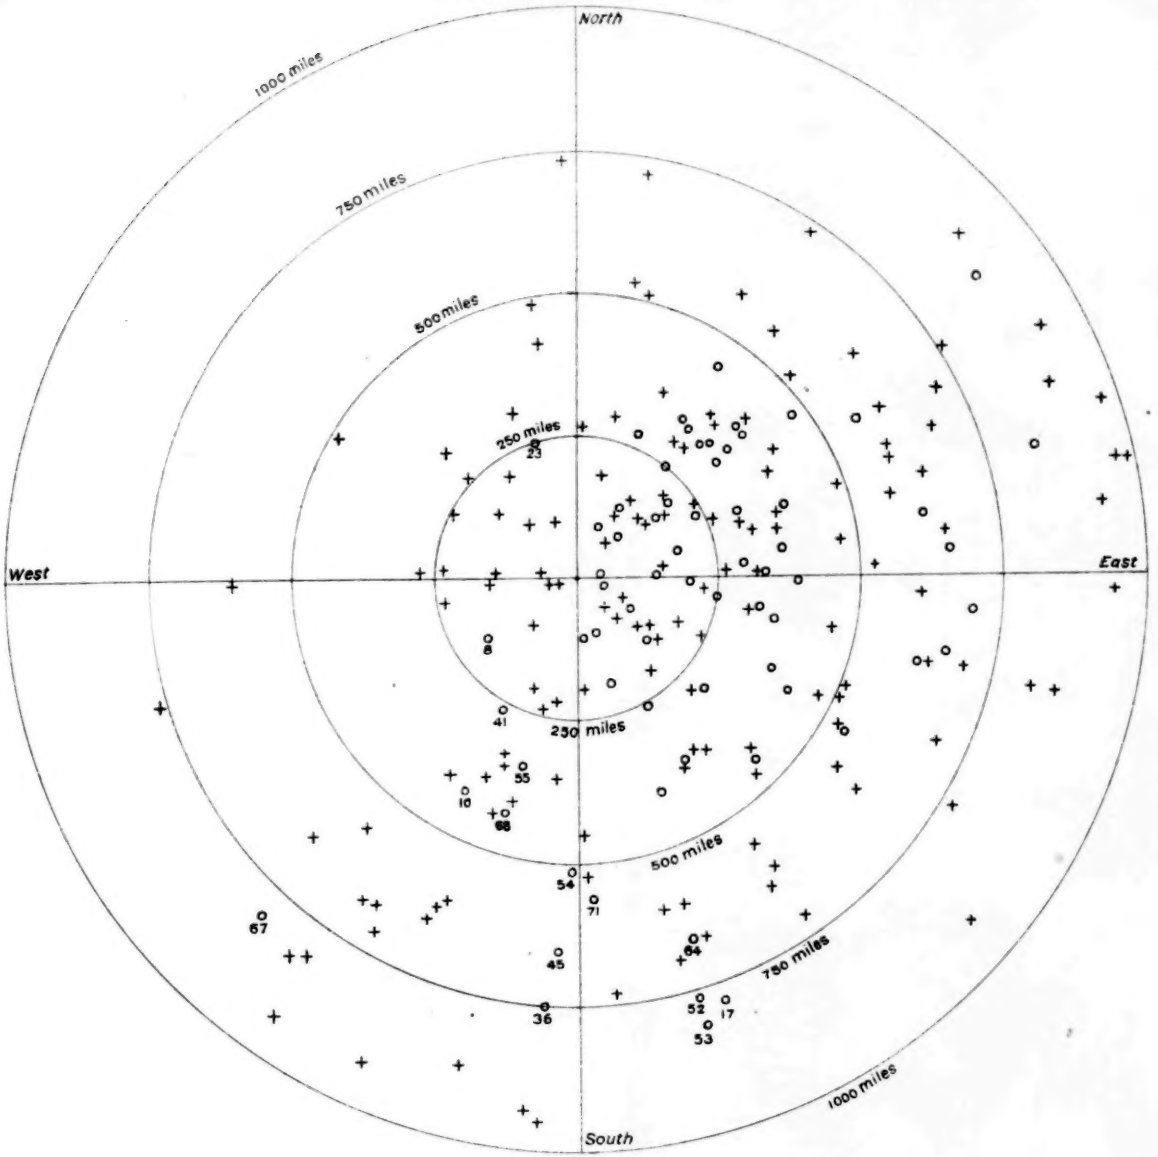
POSITION OF RAIN AREAS


PLATE I.
